

PRESCHOOL PARADE: TALES AND TAILS
LITERACY TIPS:

Social interaction increases learning at all ages, so encourage preschoolers to stay and play!

Repetition strengthens brain synapses and memory, so choose books with repetitive phrases or sentences, and ask children to practice saying them along with you.

Cutting strengthens hand muscles and hand-eye coordination in preparation for writing.

Singing nourishes the brain! It helps to reinforce memory and learn new concepts; develops speech, social behavior, and imagination.
